From: Bill Smith

Subject: Visit by members of the Central Intelligence Agency

Agency, 25 - 27 April 1983

Intention of this Visit: This visit is to be made by members of a number of elements of the CIA, and as such is designed to serve several purposes. These purposes can be encompassed by saying that the intention of the visit is to acquaint the CIA with all the current capabilities of CRI, and to acquaint them with our future directions. They have specifically requested briefings on current and future hardware, current and future software, and technology development within CRI. They have also requested a session with CRI management.

Members of the Visiting Party: The visitors are:

STAT

The visitors may be assumed to be highly knowledgeable about computers and data processing in general, but not about CRI in particular. The visitors will be accompanied by Jim Kelly, Manager Special Systems, and by Bill Smith.

The following is a proposed itinerary for the visit. The final schedule should be fixed as soon as possible.

Monday 25 April: The bulk of the visitors will arrive on NW 307 at 10:24 a.m. They will acquire their own ground transportation, and they will stay at the Registry. They will have lunch on their own.

Page Two

1:30 p.m. Depart Registry in CRI transportation to Mendota Heights.
